Confirms That Climate Change is Nothing New

River Rhine Dried Up

Statistics of Hot Summers

We know it's a scam and here's something to use as proof that the past was no different from today.

The excessive heat which prevails at present (says a Paris paper) gives some interest to the following account of remarkably hot summers:—

"In 1132 the earth opened, and the rivers and springs disappeared in Alsace. The Rhine was dried up in 1152 the heat was so great that eggs were cooked in the sand. In 1160, at the battle of Bela, a great number of soldiers died from the heat. In 1276 and 1277. in France, there was an absolute failure of the crops of grass and oats. In 1303 and 1304, the Seine, the Loire, the Rhine, and the Danube, were passed over dry footed.

In 1393 and 1394, great numbers of animals fell dead, and the crops were scorched up.

In 1440 the heat was excessive. In 1538, 1539, 1540, 1541, the rivers were almost entirely dried up. In 1356 there was a great drought over all Europe.

In 1615 and 1616, the heat was overwhelming in France, Italy, and the Netherlands. In 1646 there were fifty-eight consecutive days of excessive

heat. In 1678 excessive heat. The same was the case in the first three years of the 18th century.

In 1718 it did not rain once from the month of April to the month of October. The crops were burnt up; the rivers were dried up, and the theatres were closed by decree of the Lieutenant of Police. The thermometer marked 36 degrees Réaumur (113 of Fahrenheit).

In gardens which were watered, fruit trees flowered twice. In 1723 and 1734, the heat was extreme. In 1746, summer very hot and very dry, which absolutely calcified the crops. During several months no rain fell.

In 1748, 1734, 1760, 1767, 1778, and 1788, the heat was excessive. In 1811, the year of the celebrated comet, the summer was very warm and the wine delicious, even at Suresnes.

In 1818 the theatres remained closed for nearly a month, owing to the heat. The maximum heat was 35 degrees (110*75 Fahrenheit.)

In 1830, whilst fighting was going on the 27th, 28th, and 29th July, the thermometer marked 36 degrees centigrade (97*75 Fahrenheit). In 1832, in the insurrection of the 5th and. 6th of June, the thermometer marked 35 degrees centigrade.

In 1835 the Seine was almost dried up.

In 1850, in the month of June, on the second appearance of the cholera, the thermometer marked 34 degrees centigrade.

EVENTS COMING UP

The Alternative View Presents

Date: 24 March 2024

Time: 11:00 AM - 3:30 PM

Location: The Assembly Rooms, Glastonbury, UK

[Tickets and Info](#)

Join us for the first The Alternative View Presents with Gary Fraughen

Gary will be sharing his research and speaking about many subjects including:

Blue shift radiation
Super fluid consciousness with servants
Savants and greed
Numbers in the cracks and crevices of the universe
The universal balance sheet of doing harm to others

The highest temperature which man can support for a certain time varies from 40 to 45 degrees (104 to 113 of Fahrenheit.) Frequent accidents, however, occur at a less elevated temperature."

Yes Ian, its interesting that the MSM of that day was saying unusual weather was nothing abnormal. That's probably why it costs to access newspaper archives.

A Big Thank You

A big thank you to those of you who attended the AV13 Conference in Milton Keynes. It was fantastic to finally get back together and welcome old friends and newcomers to a very enjoyable and memorable event. We are already already working on the next AV events.

If you didn't make it to AV13 we now have the presentation recordings available.

Regards and best wishes.

The AV Team.
